

Online D&D Groups

For Neurodivergent Teens and Adults

Starts 2nd week of July

8 weeks; Online

Small group: 4-7 people

About the Game

Role-playing games, like Dungeons & Dragons (D&D), allow players to take on created personas ("characters") and build a shared story together.

The Dungeon Master guides the adventure, presents challenges, and supports the group as they make choices together.

Players roll dice to help determine the outcome of their character's endeavors, introducing elements of chance into the game.

The focus is on exploration, fun, and connection, not winning.

Group Participants

3 Groups Offered

- Teens (ages 15-17)
- College Students
- Adults (ages ~ 25+)
- Neurodivergent (Autism & ADHD)
- Interested in peer connection
- Able to participate respectfully
- Miss no more than 2 sessions
- All D&D skill levels welcome

Benefits

- Shared storytelling lets players participate at their own pace.
- Game creates an immersive, fun experience.
- Build friendships and resilience, while exploring self-identity and strengths.

About the Facilitator

The group is run by JJ Campbell, a proud Autistic individual with a master's degree in Curriculum Development and extensive experience as a D&D Dungeon Master.

JJ is compassionate, warm, funny, and sensitive to participant needs.

Testimonial

I am an AuDHD college student majoring in STEM studies. I consider myself to be an experienced gamer. I know the power of RPG and how they promote self discovery and connection. JJ is the most talented DM I have ever had!

- JS, student SRJ
